

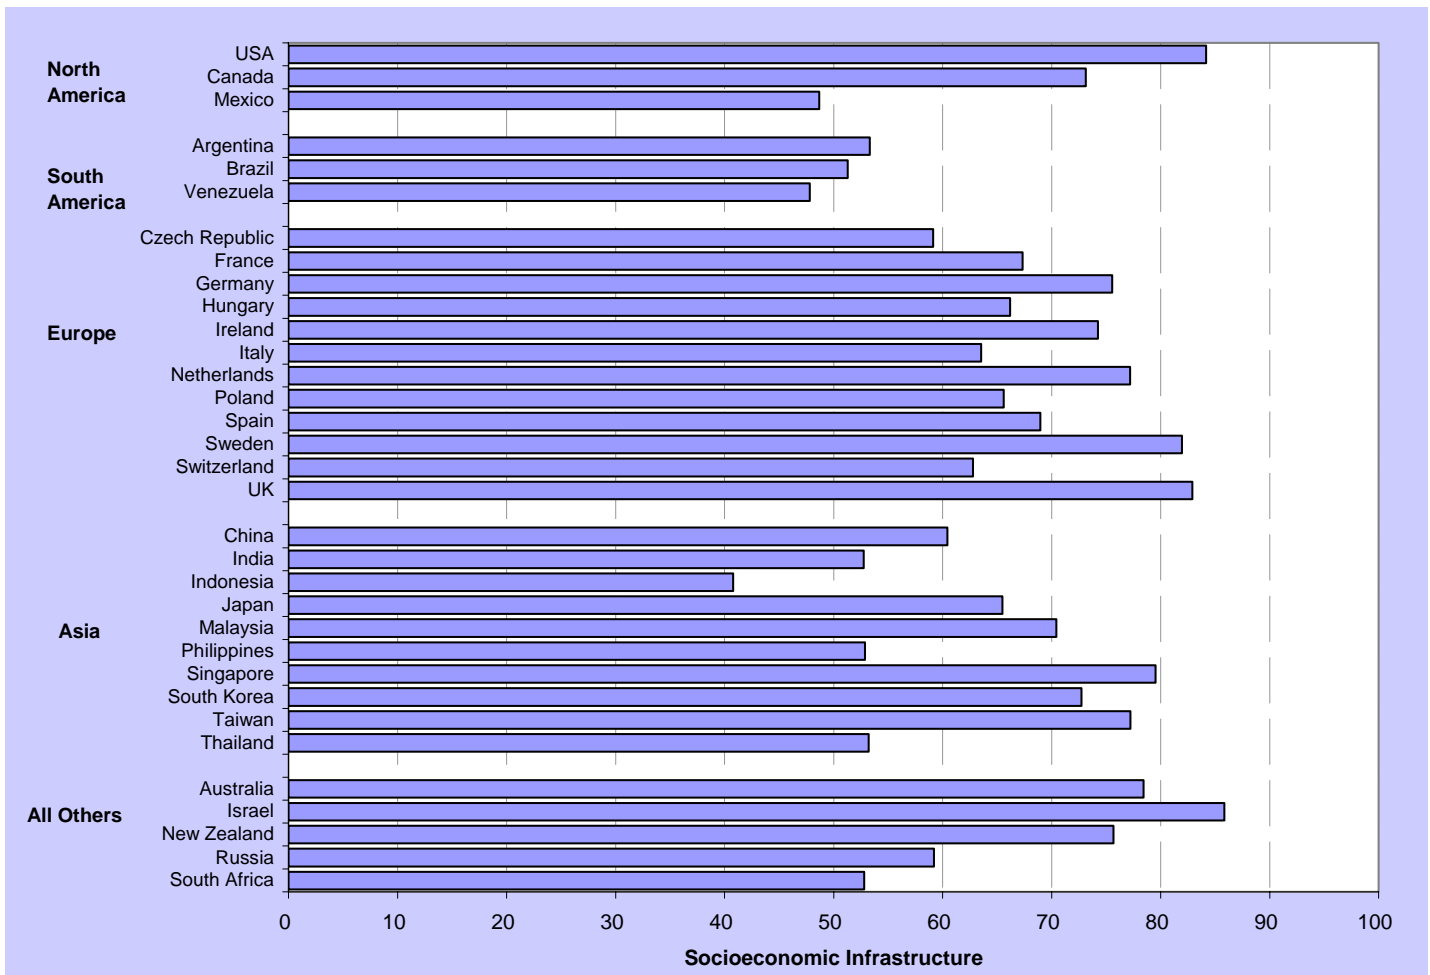

**Figure 5: Socio-economic Infrastructure 2005 Traditional -- SE-05 (T)**

The Socio-economic Infrastructure indicator exhibits some variation, yet relative to the other indicators, it has the second lowest standard deviation (12.1). Israel (85.8) scores highest, while Indonesia scores the lowest (40.8). Interestingly, China's score (60.4) does not exceed the mean (66.1), which is not the case for any of the other indicators.
